

Collecting Leads at Events

Standard Operating Procedure

Illume Student Advisory Services — International Client Representatives

This is how to collect student leads at a fair or school visit when there is no internet, and get them into the CRM afterwards.

Everything is done from **Students & Pipeline** → **Offline Capture**.

Before you travel

Do this while you still have wifi — it will not work at the venue.

1. Sign in to the CRM on the phone or laptop you will use at the event.
2. Go to **Students & Pipeline**, then tap **Offline Capture**.
3. Tap **Prepare for offline**.

The screenshot displays the Illume Student Advisory Services CRM interface. The left sidebar contains a navigation menu with options: Dashboard, Clients, Students & Pipeline (highlighted), Sources, Markets, Stakeholders, Activities, Events, Analytics, Reports, Tasks, HR & ERP, Travel, and Risk & Compliance. The main content area shows the 'Student Pipeline' section, which includes a search bar, a notification about offline capture limits (up to 100 leads per session), and a Kanban view of the recruitment funnel. The funnel stages are: NEW LEAD (2 leads), CONTACTED (0 leads), QUALIFIED (0 leads), and APPLICATION SUBMITTED (0 leads). Two lead cards are visible in the 'NEW LEAD' stage: Tunde Bello (MSc Data Science, PG, Jan 2027) and Amara Okeke (BSc Computer Science, UG, Sep 2027). The interface also includes an 'Add Lead' button and an 'Offline Capture' button.

You will see a warning until this is done:

Offline Capture

Collect leads at an event with no internet, then upload them all at once.

Connected

Capturing as Screenshot Demo

Prepare for offline

Upload all

Not ready for offline yet. Tap "Prepare for offline" while you still have a connection, or the Source, Event and Institution lists will be empty at the booth — and Lead source is required before a lead can progress.

Offline capture holds up to 100 leads per session. Upload them before collecting more — beyond 100 nothing further can be saved on the device.

New lead

Both an email and a phone number are needed — ask for both while the student is still with you.

First name * Nkechi	Last name * Obi
Email * 	Phone *
Citizenship * Nigerian	Country of residence * Nigeria
Intended programme * BSc Computer Science	Study level * Select
Intake month * Select	Intake year * 2027
Intended destination 	Preferred country

Once prepared, the date it was downloaded is shown:

Ready for offline
Lists saved to this device.

Do this on the day you travel. If the lists are weeks old, an event or agent added since then will not appear, and you will not be able to record it.

If you skip this step, Lead Source will be empty at the booth. Lead Source is required before a student can be moved past "New Lead", so those leads would be stuck and need re-entering by hand.

At the booth

Recording a student

Fill in the form and tap **Save to device**.

The screenshot displays the 'Illume Student Advisory Services' web application. On the left is a dark blue sidebar with a menu including Dashboard, Clients, Students & Pipeline (highlighted), Sources, Markets, Stakeholders, Activities, Events, Analytics, Reports, Tasks, HR & ERP, Travel, and Risk & Compliance. At the bottom of the sidebar is a user profile for 'Screenshot Demo' with an email address and a 'Sign Out' button. The main content area features a search bar at the top. Below it is a form with several fields: 'Intended destination' (text input with 'Canada'), 'Preferred country' (text input), 'Lead source' (dropdown menu with 'None'), 'Event' (dropdown menu with 'None'), 'Institution' (dropdown menu with 'None'), 'Budget range' (dropdown menu with 'Not asked'), and 'English status' (dropdown menu with 'Not asked'). There is a 'Notes' section with a text area containing 'Anything worth remembering about this conversation'. Below the notes is a section titled 'May we email them?' with a red asterisk and a note about Canadian anti-spam law. It includes three buttons: 'Yes, they agreed' (highlighted), 'No, they declined', and 'Didn't ask'. A '+ Save to device' button is located at the bottom right of the form. At the very bottom, there is a section titled 'Held on this device (0)' with a 'Refresh' button and a message: 'Nothing captured yet. Leads saved here stay on the device until you upload them.'

You must have both an email address and a phone number. Ask for both while the student is still in front of you — the form will not save without them.

If the event uses scannable badges

Tap **Scan badge** and hold the badge inside the frame. Whatever can be read is shown for you to check before it fills the form, and you can change anything.

Badges differ between organisers. Some carry a full contact card, others only an attendee number — so always check what came through.

Scan badge only appears on Android phones using Chrome. iPhones cannot do this. Type the details in as normal.

Permission to email

Every student must be asked: **"May we email them?"**

Canadian anti-spam law requires their permission before we send marketing email.

Answer	What it means
Yes, they agreed	We may email them
No, they declined	We must not email them
Didn't ask	Nobody asked — we can still ask later

"Didn't ask" is not the same as "declined." Record it honestly. Marking someone as declined when they were never asked means we lose a student we could have contacted.

Each lead is saved onto the device

Upload at the end of every day. Until you do, those students exist only on that one device. If it is lost, broken or wiped, they are gone.

If something goes wrong

The upload stopped halfway. Tap **Upload** again. Students who already went through are recognised and will not be added twice.

A student was rejected. They stay on the device with a note explaining what is wrong. Tap the pencil next to them, correct it, and save. They will go up with the next upload. Other students are unaffected.

It says I have been signed out. Sign in again and tap **Upload**. Nothing has been lost.

The upload failed completely. Nothing is removed from the device when an upload fails. Try again when you have a better connection.

Nothing appears when I open the page without internet. The page must have been opened at least once while connected. Reconnect, open Offline Capture once, and it will work without a signal from then on.

Rules to follow

1. **Prepare for offline on the day you travel** — not the week before.
 2. **Always collect both an email and a phone number.**
 3. **Always ask about email permission** and record the honest answer.
 4. **Never invent details** to get past the form. A made-up email address is worse than no lead at all — it cannot be contacted, and it corrupts our records.
 5. **Upload at the end of every day.**
 6. **Do not use a private or incognito window.** Leads cannot be saved in one.
 7. **Use your own device** where possible. Leads are filed under whoever uploads them, so uploading a colleague's work records it as yours.
